### Introduction

#### 25X1X7

1. The purpose of this addendum is to update the order of battle segments of the Estimate of the Communist Chinese Air Threat Against India dated 17 January 1963.

### Aircraft Order of Battle

2. Chinese Communist Air Force and Naval Air Force combined order of battle as of 17 January 1963 and 15 April 1964 are listed at appendix A. Disposition of these aircraft at the present time by Air Defense District is illustrated on the map at appendix D.

### Aircraft Performance

3. Important revisions in aircraft performance from that previously supplied are indicated at appendix B.

### Airfields

4. Airfields which we believe are most likely to be used by the Chinese in conducting air strikes against India are listed at appendix C.

### Radar Coverage

5. Chinese early warning and ground controlled intercept coverage are indicated on the map at appendix D.

### Surface-to-Air Missiles

6. Chinese Communist surface-to-air missile sites now number at least twelve. None are believed to be farther south than Lanchou or Hsian, a minimum distance of some 600 nautical miles from the Indian border.

€/ We believe that BEAST strength was underestimated by 20 in

January 1963.

Reference to 30 MIG.15 (FAGOTS), as being specially trained in ground attack, was carried in a footnote to Appendix A in study dated 17 January 1963 and was not included in the the total.

A unit of 30 MIG.15 (FAGOTS) continues to be specially trained in ground attack. All FAGOT/FRESCO aircraft, however, are adaptable to ground attack operations.

Reduction due to attrition.  $\frac{1}{2}$  Reduction due to attrition.

Although these BADGERS may participate in training activity, we do not believe they are capable of conducting combat operations.

K/ Increase due to domestic production.

One assigned to Air Force. Remaining Viscounts assigned to Civil Air Fleet.

 $^{\mathrm{m}}$ / Although HOUNDS probably have been produced within China for several years, our first confirmed evidence of utilization within the CCAF has come within the past year.

m/ Earlier strength apparently underestimated.

□ Reduction due to attrition.

P/, Increase due to domestic production.

g/, Reduction due to attrition.

This total adjusted to include the 30 ground attack FAGOTS. See footnote "f" above.

b/ Reduction due to attrition. C/ Limited all weather fighter.

d/ We do not believe that there has been an increase in FARMERS during the past year. Rather, we believe that our earlier estimate of 60 should have been 80.
